Quick Start
Guide

STEP 1

Getting Connected

Connect Your HDTV Antenna

For optimal OTA reception, place your antenna near a window or outdoors, pointing towards your local broadcast towers. Next, connect your antenna to your Tablo DVR via the coaxial connection. Ensure the connector is tightly secured.

Connect a USB Hard Drive

Connect a USB hard drive (1 TB to 8 TB in size).

Connect Tablo to your TV

Use the HDMI cable (provided) to connect your Tablo DVR to your TV.

Connect Tablo to Your Home Network

Use the Ethernet cable (provided) to connect your Tablo DVR to your router. If your TV and antenna placement does not enable you to connect via Ethernet, connect Tablo to your home network via WiFi. See **page 3** for details.

Connect the Power Adapter

In order to function correctly, your Tablo DVR must be powered on at all times, including overnight.

For help with antenna selection and positioning, a list of recommended hard drives, additional set-up instructions and troubleshooting tips, visit www.TabloTV.com/setup.

STEP 2 Change HDMI Input to Tablo

Using your TV's remote, select the HDMI input that you have your Tablo DVR connected to.

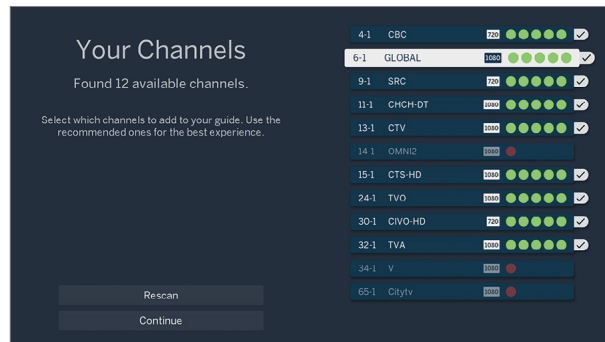

STEP 3 Setting Up the Tablo Remote

On the back side of the remote, slide open the battery cover. Insert batteries (included). Your remote should pair with your DVR automatically.

STEP 4 Follow the Tablo DVR Setup Wizard

The setup wizard will walk you through connecting Tablo to the internet over Wi-Fi (if not already connected by Ethernet) and then it will check for software updates.

Then it will perform a channel scan to determine what channels can be received by your antenna.

You can add/remove recommended channels from your guide at this time. Be sure to select 'Rescan' if you change or adjust your antenna's position after the initial channel scan.

The wizard will also ask to format your USB hard drive.

Is your lineup missing local channels you expected to see? Is your Tablo DVR not finding any channels during a scan? Visit www.TabloTV.com/channelscan for help.

STEP 5 Program Guide Data Download

Once you select 'Continue', the first 24 hours of the program guide will begin to download. This process will take several minutes per channel.

Your Tablo DVR is now ready to enjoy!

Missing or incorrect guide data? Visit www.TabloTV.com/guide for help.

STEP 6 Connecting Additional Playback Devices

Tablo DUAL HDMI DVRs also support in-home streaming of live and recorded TV via select Smart TVs and streaming devices.

In order to enjoy Tablo content on those devices, you will need to download the appropriate Tablo app and follow the on-screen prompts to connect it to your Tablo DUAL HDMI DVR.

Note: Streaming to additional televisions requires a very strong home WiFi network to avoid buffering.

Tablo Interface Feature Highlights

The Tablo interface makes it easy to discover, record, and watch beautiful Over-the-Air TV. Here are some of the awesome features you can enjoy.

Live TV

To begin watching live TV, select the channel ID on the far left of the Live TV grid guide. In this view, you can also browse and schedule recordings for programs airing over the next two weeks.

Guide

In the guide screens (Prime Time, TV Shows, Movies, and Sports) browse programs airing over the next 14 days and schedule recordings by series (ALL or NEW) or by episode.

Recordings

View, play, delete, and protect completed recordings from the recordings screen.

Skip to the Good Stuff

Fast-forward preview thumbnails are available on completed recordings to help you skip ahead or rewind the best parts

Closed Captioning

Closed captioning is available on Tablo DUAL HDMI as well as all secondary playback devices.

Settings

View, edit, and manage your Tablo guide data service subscription, storage space, and more from the settings screen.

Note: Screen and feature availability may vary between Tablo DUAL HDMI and Tablo apps on secondary streaming devices.

Troubleshooting—Tablo DVR and App Initial Set Up

Guide Data is Incorrect or Missing

For incorrect data or data missing from specific channels, contact Tablo Support for assistance. While we work to correct your guide data problem, try entering a zip/postal code from a neighboring area by editing your 'location' in the settings screen.

Video Playback is Loading or Pausing Frequently on Additional Devices

This is typically a home network bandwidth issue. If possible, connect your playback device and/or Tablo via Ethernet instead of WiFi to rule out potential WiFi interference and/or network congestion.

Video Playback is Pixelated/Audio Drops Out

OTA antenna signal strength is inadequate or reduced. Check your antenna's connection to Tablo and/or its position. Run a new channel scan within settings to determine current signal strength.

Recordings Incomplete or Failed

OTA antenna signal and/or external hard drive were unavailable at the time of the recording. Antenna and/or hard drive may require attention.

Hard Drive Not Recognized

If you have connected a USB hard drive and its details are not shown in your settings screen and/or you have not received a prompt to format it during the setup process, try rebooting the Tablo using the restart option in the settings menu. If you still do not receive a prompt to format the drive, contact Tablo Support for assistance.

More detailed instructions, user manuals, and troubleshooting tips can be found online in the Tablo Knowledge Base at support.TabloTV.com.

About the Tablo Guide Data Service

Each new Tablo DVR unit comes with a free 30-day trial of the Tablo guide data subscription. The trial is activated automatically as soon as you complete the setup process.

At any time, you can verify your subscription status near the top of the settings screen of your Tablo app.

Without a Tablo subscription, you can still watch live TV and set manual recordings by date/time/channel.

In order to maintain access to a full 14 days of TV guide data as well as Tablo's advanced DVR features, you must select and purchase a subscription at [account.TabloTV.com](https://www.tablotv.com) before your trial expires. Note: Your paid subscription will begin at the end of your 30-day trial.

Need additional details and pricing? Visit www.TabloTV.com/subscription.

Support hours of operation are Monday–Friday, 9:30 a.m. to 5:30 p.m. ET, excluding Canadian holidays. Messages received outside of those hours will be returned within 1 business day.

Warranties & Returns

We hope you love your Tablo, but if you're unhappy for any reason we offer a 30-day return policy on new units purchased through TabloTV.com. For units purchased through retail partners, the retailer's return policy applies. All Tablo units include a 100% repair or replacement warranty for 12 months from the original purchase date.

Tablo's complete warranty and return policy can be found on our website at www.TabloTV.com/warranty-returns.

Federal Communication Commission Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Industry Canada Statement

This device complies with Industry Canada's license-exempt RSSs. Operation is subject to the following two conditions: (1) This device may not cause interference, and (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Déclaration d'Industrie Canada

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
